

DIAMANT Polymer expands into the North American market with company acquisition

Mönchengladbach/Cincinnati, February 25, 2025: As part of its global expansion, DIAMANT Polymer GmbH acquired DIAMANT Polymers Inc. USA on January 1, 2025. The company, based in Cincinnati (Ohio), manufactures and distributes DIAMANT products for the North American market, but is also expected to expand production of selected products in the future. With the acquisition of DIAMANT Polymers Inc., the German parent company has secured direct access to the US market. DIAMANT Managing Director Carsten Kunde wants to “set new standards and maintain values with our innovative polymer systems not only in Germany, but worldwide. North America is one of the key markets of the future for us.”

The DIAMANT range of high-performance polymer systems are used to seal surfaces, repair defects and support structures. DIAMANT's products are used in foundries, thermal spray companies and major construction applications. DIAMANT's products and services help minimize downtime, preserve value and reduce operating costs.

DIAMANT's US subsidiary focuses on Dichtol and MM1018 – The Liquid-Shim®

The American subsidiary DIAMANT Polymers will focus on the sale of Dichtol. This is a low-viscosity polymer for infiltrating, impregnating and sealing porous layers of additively manufactured components (3D printing) and workpieces. Another mainstay in the USA will be the sale of polymer composite materials for repairing and repairing defects in cast parts and MM1018 – The Liquid-Shim®. The two-component reactive resin system is an innovative solution for force-fit tolerance compensation in steel and bridge construction.

Production of selected products in the USA in the future

According to Carsten Kunde, “in addition to expanding our sales activities, we are also planning to produce more products ourselves in the United States. In my view, sustainable business practices include keeping transportation routes and supply chains as short as possible. That's why we focus on manufacturing, storing and distributing our high-quality products locally as quickly as possible.” This not only benefits the environment and climate protection, but also the regional economy. In addition, “in this way, we can respond better to local requirements and customer demands.”

Upcoming trade fair appearances of DIAMANT Polymer GmbH in the USA/Canada

08.-10.04.2025 | RAPID & TCT 2025, Detroit, USA

12.-15.04.2025 | CastExpo 2025, Atlanta, USA

05.-08.05.2025 | ITSC 2025, Vancouver, Canada

13.-16.07.2025 | International Bridge Conference, Pittsburgh, USA

About DIAMANT Polymer GmbH

DIAMANT Polymer GmbH in Mönchengladbach is a supplier and producer of polymer systems. This term refers to composite materials as well as repair and impregnation materials. DIAMANT specializes in low-viscosity polymer products for the infiltration, impregnation and sealing of porous structures as well as highly filled composite systems for the transmission of dynamic and static loads.

DIAMANT's products and services help to minimize downtimes, avoid costs and maintain values in the long term. The company sets standards in the industry with innovative solutions. Beneficiaries include steel, bridge and mechanical engineering, foundries, the automotive industry and customers in the fields of additive manufacturing (3D printing) and thermal coatings.

All DIAMANT Polymer GmbH products are “made in Germany”. This means that they are formulated, developed and produced in Germany. They are then shipped to the world's industrial centers via a global sales network of over 40 foreign representatives. DIAMANT Polymer GmbH also has two foreign branches with their own production facilities in Bangalore, India and Jakarta, Indonesia. DIAMANT Polymer GmbH is represented in the North American market by its subsidiary DIAMANT Polymers Inc. USA.

DIAMANT Polymer GmbH acts with the customer-oriented thinking of a family business and is committed to responsibility for people and the environment, but also to uncompromising quality and performance: <https://www.diamant-polymer.de/>
